「學者交流訪問計畫」

短期訪問進行情形報告

訪問學者	Bill Schreiner		
主辦單位	全球定位科學研究中心(GPS-ARC)	邀訪者	黃清勇 教授
時 間	2012 年 8 月 21 日 至 2012 年 8 月 24 日		

主旨：擔任 2012 掩星暑期營授課講師及演講，介紹 GPS RO Excess Phase Processing 。Lecture in GPSARC RO summer camp and discuss about the application of precise orbit determination of FORMOSAT-3/COSMIC and FORMOSAT-7/COSMIC

行程及活動經過：Lecture for students. The given topic is “GPS RO Excess Phase Processing.”

檢討：

The uncertainty of computing excess phase is mainly caused by the determined FORMOSAT-3/COSMIC orbit and clock. Additionally, the orbit accuracy is highly related to the satellite attitude control. The zero-differenced data process produces less noise than single- and double-differenced data process. Since the above uncertainties, the COSMIC-derived bending angle noise is higher than the METOP-derived one. The use of 5-sec GPS clock will slight improve the noise in the zero- and single-differenced data processing.

建議：

The above factors will affect the retrieval of atmosphere profile. Therefore, in the FORMOSAT-7/COSMIC-2 mission, the improvements of orbit accuracy, clock stability and attitude control over FORMOSAT-3/COSMIC are expected. If FORMOSAT-7/COSMIC-2 equips with the ultra-stable oscillator, it will be helpful for the zero-differenced data process. With the GNSS development, we need to modify software for FORMOSAT-7/COSMIC-2 and improve the quality control.

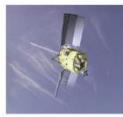

相關活動：

Discussion about error sources of precise orbit determination and satellite attitude control.

Some Aspects of Inversion of GPS RO Signals

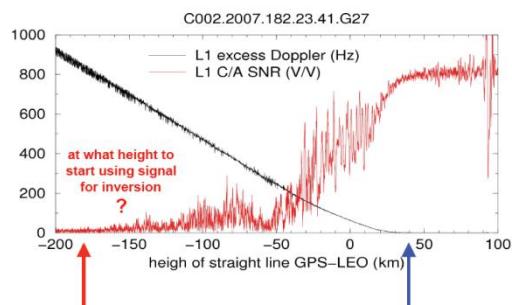

Bill Schreiner
S. Sokolovskiy, Janet Zeng, D. Hunt, B. Kuo
UCAR COSMIC Program Office
www.cosmic.ucar.edu

Aug 23, 2012

Seminar at NCU/Taiwan

Upper stratosphere and lower troposphere are regions of maximum uncertainty for GPS RO inversions

In the lower troposphere:
the signal reduces below noise level
in terms of the amplitude

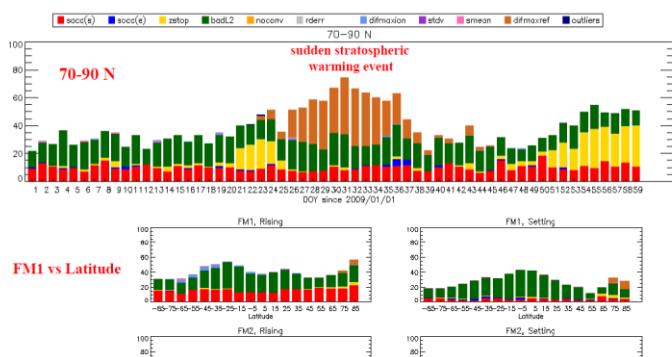

In the upper stratosphere:
the signal reduces below noise level
in terms of the phase (Doppler)

Aug 23, 2012

Seminar at NCU/Taiwan

Neutral Atmospheric Profile QC

- COSMIC data from Jan-Feb 2009
 - Green failures due to poor quality of L2 signal
 - Tan failures due to large departures from climatology
 - Red failures due to problem with rising occultation tracking

「學者交流訪問計畫」

短期訪問進行情形報告

訪問學者	Tomoko Matsuo		
主辦單位	全球定位科學研究中心(GPS-ARC)	邀訪者	黃清勇 教授
時 間	2012年8月21日至2012年8月25日		

主旨：

此行主要在 GPS 掩星暑期營期間，為新進學員講授資料同化概論以及其在電離層反演資料方面的應用，另外公開演講進階之高層大氣 EnKF 資料同化，並進行相關討論與交流。

行程及活動經過：

8/22 資料同化概論及應用講座

8/23 高層大氣 EnKF 資料同化演講與討論

檢討：

電離層資料同化已從過去的電離圖資料同化進展到掩星電離層電子密度剖線資料同化，但不論國內外都面臨大量計算資源的窘境。Matsuo 博士在 NOAA 使用大型叢集電腦平行運算，雖然資料同化相關程式可能取得，但仍需相當的軟硬體支援，因此未來福衛七號之電離層天氣現報或預報的作業即時性還有待克服。

建議：

建議國家太空中心持續支持電離層相關研究經費。

相關活動：

第一場講座介紹資料同化是先驗系統狀態與直接或間接觀測量的組合，進而由貝氏理論推導後驗機率函數（即條件機率函數，表示在現有觀測量的條件下，先驗值發生的可能性有多少）方程式，並說明共變異數所扮演的角色，最後以福衛三號電離層路徑 TEC（觀測量）為例，展示資料同化前後的差異。

第二場公開演講從人造衛星在太空中的分布談起，說明熱氣層的物質密度會影響衛星軌道的預測。因為我們想要追蹤衛星及太空垃圾，以預知衛星被太空垃圾撞擊的機率為何。但又從何得知熱氣層的物質密度為何呢？熱氣層的觀測量非常稀疏，因此我們需要高層大氣的資料同化。以 EnKF 為基礎，推導出來的條件機率函數，針對德國 CHAMP 衛星所進行的觀測模擬實驗 (OSSE)，顯示中性大氣密度的誤差，在衛星軌道附近獲得改善。應用福衛三號電離層電子密度剖線於高層大氣的 OSSE 實驗也有初步成效，因此可望應用於未來的福衛七號掩

星観測実験。

E-Mail: jens.wickert@gfz-potsdam.de

Wissenschaftliche Interessen:

- GPS-Radiookkultation der elektrisch neutralen und ionisierten Atmosphäre
- Bodengestützte GPS-Atmosphärensondierung (Atmosphäre/Ionosphäre),
GPS-Reflektometrie/Scatterometrie, GPS-Empfängertechnik
- Entwicklung von Auswertesoftware für boden- und satellitengestützte GNSS-Messungen
und deren Anwendung unter Echtzeitaspekten
- Geodäsie/Satellitengeodäsie, Geophysik, Atmosphären-/Ionosphärenforschung,
GNSS-Seismologie, Erdsystemforschung, interdisziplinäre Forschungsprojekte
- Planung, Realisierung und Betrieb von Satellitenmissionen mit GNSS-Komponenten
- Einwerbung von Drittmitteln für Forschungsprojekte auf nationaler und internationaler
Basis bei unterschiedlichsten Projektförderern und Leitung der damit verbundenen
Forschungsprojekte
- Publizieren und Popularisieren von wissenschaftlichen Ergebnissen
- Wissenschaftliches Programmieren mit FORTRAN und IDL

- Arbeiten mit LATEX, MS Office, COREL, HTML
- Digitale Fotografie und Bildbearbeitung (mit Adobe Software, z.B., Photoshop, Illustrator, und Premiere)
- Populärwissenschaftliche Vorträge (z.B. URANIA) Satellitenmissionen, Antarktisüberwinterung
- Autor und Fotograf für populärwissenschaftliche Zeitschriften (u.a. MARE, Themen Antarktis, Kaiserpinguine)
- Sprachen: Englisch, Russisch (sehr gut/fliessend), Lettisch, Französisch (Grundlagen)

「學者交流訪問計畫」

短期訪問進行情形報告

訪問學者	Dr. Jens Wickert		
主辦單位	全球定位科學與應用研究中心 (GPSARC)	邀訪者	黃清勇 教授
時 間	2012 年 8 月 22 日 至 2012 年 8 月 25 日		

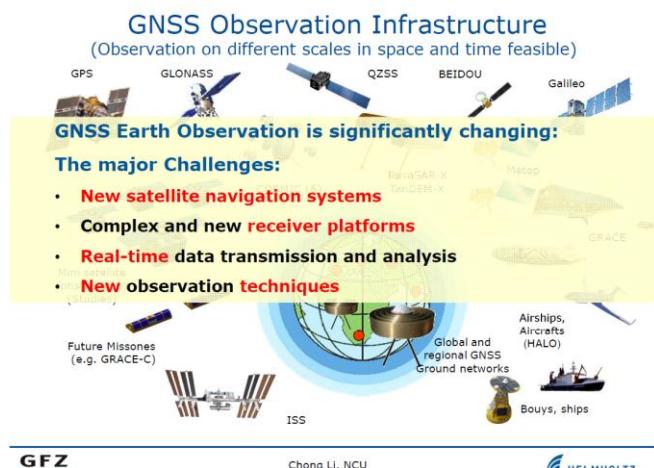

主旨：擔任 2012 掩星暑期營授課講師及演講，GPSARC 與 GFZ 兩單位學術合作及交流。

行程及活動經過：

1. 於 101.08.22 抵達台灣準備授課資料與演講資料
2. 於 101.08.23 於中央大學 S1-713 授課，授課題目”**GPS Reflectometry: Short Introduction and Activities at GFZ**”。下午於 S1-702D 演講，題目為 GNSS Reflectometry: Introduction, Recent Results from GFZ and future Prospects。
3. 於 101.08.24 下午 03:00 與中央大學 GPSARC 人員討論未來合作與 GPS 反射應用技術交流。
4. 離開台灣。

檢討：

這次的交流，Jens 帶給我們許多 GPS 反射訊號的應用和研究的新觀念與新的應用。提供我們未來發展新的衛星任務許多寶貴的經驗，GFZ 的經驗有許多可借鏡之處。

建議：

未來與 GFZ 可多加強合作或學者交流

Education:

Ph. D. Atmospheric science, May 1998, University of Wisconsin-Madison,

M.S., Atmospheric science, May 1995, University of Wisconsin-Madison

M.S., Meteorology, May 1992, Rutgers-the State University of New Jersey

B.A., Computer Science, May 1987, Feng Chia University, Taichung, Taiwan

Professional Experiences:

2008/03- UCAR/COSMIC, NCAR/ACD, Project scientist II

2005-2008: UCAR/COSMIC

2002-2005: NCAR/ACD, Project scientist I

2001-2002: NCAR/ACD, Associate Scientist III

1998-2001: Analytical Service & Materials, Inc., in affiliation of NASA Langley Research Center,
Hampton, VA, Research Scientist

1993-1998: Department of Atmospheric and Oceanic, University of Wisconsin-Madison, Research
Assistant

1990-1992: Department of Meteorology, Rutgers-the State University of New Jersey,
Research Assistant

Professional Activities

Member of the American Meteorological Society

Member of the American Geophysical Union

Member of the International Society for Optical Engineering

Awards and Recognitions:

Member of international working groups, the World Climate Research Programme (WCRP) Global
Energy and Water Cycle Experiment (GEWEX).

Member of international working groups, the World Climate Research Programme (WCRP) Global
Stratospheric Processes and their Role in Climate (SPARC)

January, 2012: Invited visiting to the GPS Scientific Application Research Center in National
Central University, Taiwan from 5 to 15 January, 2012.

February, 2012: Selected in "Who is who in American" for 2013 issue.

June, 2011: Selected in "Who is who in American" for 2012 issue.

May, 2011: invited to join the WCRP SPARC group.

March, 2011: invited to attend the World Climate Research Programme (WCRP) Global Energy and Water Cycle Experiment (GEWEX) Radiation Panel (GRP) workshop and the ESA Data User Element (DUE) programme's global Vapour project in Frascati, Italy.

November, 2010: invited to be a Contributing Author for the Fifth Assessment Report 2 of the Intergovernmental Panel on Climate Change (IPCC WGI AR5).

June 2010: Invited visiting to the GPS Scientific Application Research Center in National Central University, Taiwan from June 5 to July 2, 2010.

March 2009: Invited to workshop on the "Assessment of Small Satellite Missions to "Meet the Needs of the Earth Sciences", University of Colorado Laboratory for Atmospheric and Space Physics (LASP).

July 2009: Selected in "Who is who in American" for 2010 issue.

June 2008: Selected in "Who is who in American" for 2009 issue.

April 2007: Special Contribution to UCAR COSMIC Mission Award.

April 2007: Selected by "Who is who in the World" for 2008 issue.

May 2006: Selected in "Who is who in American" for 2007 issue.

Internal:

December 2006: UCAR Outstanding Accomplishment Award for Scientific and Technical Advancement (for the MOPITT project).

September 2006: Key Contributor to UCAR COSMIC Program Award.

October 2008: COSMIC Special Recognition Award for coordinating COSMIC Student Program.

Externally Funded Collaborations:

1. Principal Investigator: Validation and Calibration of MSU/AMSU Measurements and Radiosonde Observations Using GPS RO Data for Improving Stratospheric and Tropospheric Temperature Trends, NOAA, NA07OAR4310224, POP: 08/01/07-07/31/10 (300K/ for three years, finished).

2. Principal Investigator: Satellite and Ground-Based Validation of TES Tropospheric CO Products, NASA, NNX07AB52G, POP: 01/15/07-01/14/10 (600K for thee years).

3. Co-Principal Investigator: A Climate Virtual Observatory (CVO): Online Data Fusion & Analysis for Climate Variability & Change, POP: 04/01/08-03/31/09 (350K for two years finished).

4. Co-Principal Investigator: UCAR-NOAA Collaborative Planning for an Operational Radio Occultation (RO) Mission, NOAA NESDIS, 2009-2011 (on going).

5. Co-Principal Investigator: Climate Trends and model Evaluation by Radio Occultation Trendeval: Analysis, Detection and Attribution of Atmospheric Climate Trend and Climate Model Evaluation based on Data Records from Radio Occultation, Research Project Proposal to the Austrian Science Fund, 2009-2011, POP: 07/01/10-06/30/12 (on going).

6. Principal Investigator: Construction of Consistent Microwave Sensor Temperature Records and Tropopause Height Climatology Using MSU/AMSU Measurements, GPS RO Data and Radiosonde Observations, NOAA, POP: 07/01/2009-06/30/2012 (600K for three years, on

going).

7. Co-Principal Investigator: Operational processing of COSMIC Radio Occultation Data, 2011-2015 (on going).
8. Consultant: NASA FBAR project, 2010-2013 (on going).
9. Co-Principal Investigator: Applications and Construction of Climate Data Records for Global Climate Change Studies, China-973 project, China, 2010-2014 (on going).
10. Principal Investigator: RO-Calibrated AMSU Brightness Temperature CDR, NOAA (dole source contract, 50K/year, on going).

Professional Service:

- 2006 – present: NOAA climate contact for COSMIC
- 2006 – present: NASA TES/Aura Science Team, Member
- 2008 – present: NASA sounding science team, Member
- 2006 – present : Multi-center RO trend analysis team, Member
- 2007 – present : NOAA climate data record science team, Member
- 2010 – present : NOAA climate data record science team, lead of GPS RO data
- 2005 – present : Professional Journal Reviews:
 - Atmospheric Chemistry and Physics
 - Atmospheric Environment
 - Environmental Chemistry
 - Geophysical Research Letters
 - Journal of Geophysical Research-Atmospheres
 - IEEE Transactions on Geoscience and Remote Sensing
- 2008 – present : Proposal review for NASA
- 2006 – present : Internal review for NCAR ACD and UCAR COSMIC proposals
- Organizer of the Workshop on the Applications of GPS Radio Occultation to Climate, NCAR Foothills Laboratory, Building #1 Atrium Conference Room 3450 Mitchell Lane, Boulder, CO 80301 March 17-18, 2008.
- Supervisor of COSMIC student program, 2008
- Organizer and Co-chair of the COSMIC-NOAA meeting in AMS, 2008.
- Program Committee of COSMIC 2009 International Workshop
- Coordinator and moderator of the UCAR/COSMIC Seminar Series, 2009-
- Chair of NCAR Asian Listening Meeting breakout section, 2008
- Chair of COSMIC scientific applications section in the COSMIC/NCAR/UCAR retreat, 2009.
- Chair and panel member for the Science Opportunities for COSMIC-II, COSMIC/NCAR/UCAR retreat, 2010, Lake Shore Lodge and Conference Center, Estes Pak, CO.
- Committee of NCAR Asian circle Meeting, 2009-present.
- Organizer and Co-chair of COSMIC-NOAA climate meeting in AMS, 2008.

- Organizer and Co-chair of COSMIC-NOAA climate meeting in AMS, 2009.
- Organizer and Co-chair of COSMIC-NOAA climate meeting in AMS, 2010.
- Chair of student poster competition of COSMIC international workshop, Boulder, CO, USA, October, 2009.
- Panel member of NCAR Asian circle Meeting, 2010
- Director of the Student Program for 2011 COSMIC student trip and workshop, Taipei, Taiwan.
- Organizer and Co-chair UCAR/COSMIC workshop the RO inversion and climate workshop in Estes Park, CO, USA from 28th March to 3rd April 2012, together with the CGMS International Radio Occultation Working Group (IROWG).
- Lead of the WCRP (World Climate Research Program) GEWEX Radiation Panel (GRP) water vapor profile climate data record assessment.
- Chair for the climate section in the 5th FORMOSAT-3/COSMIC Data Users Workshop & ICGPSRO, April, 2011, Taipei, Taiwan.
- Co-Chair of student poster competition of the 5th FORMOSAT-3/COSMIC Data Users Workshop & ICGPSRO 2011, April, 2011, Taipei, Taiwan.
- Co-Chair for the COSMIC workshop of the GPS RO Data Processing for Climate Applications, Estes Park, CO, USA from 28th March to 3rd April 2012.
- RO inversion and climate workshop, September, Boulder CO., 2011. □ Member of the WCRP (World Climate Research Program) SPARC global temperature profile climate record assessment.
- Chair of Workshop Organizing Committee for the sixth COSMIC users workshop, 2012.
- Chair for the climate section in the 2nd IROWG Workshop 28 March 3, April 2012, CO, U.S.A.
- Moderator of the section of Inventory and requirements on data records and reference data working group for the GEWEX water vapor assessment workshop, September, 25-28, 2012, Germany.

Supervisory Experiences:

2007-2008: supervisor of Dr. Wenying He, COSMIC/UCAR visiting scientist from Institute of Atmospheric Physics, Chinese Academy of Sciences, Beijing, China.

2008-present: supervisor of Xinjia Zhou, COSMIC/UCAR visiting scientist from Institute of Atmospheric Physics, Chinese Academy of Sciences, Beijing, China.

2008-present: supervisor of Dr. Patrick F. Callaghan, COSMIC/UCAR post-graduate scientist.

2009-2010: supervisor of Professor Jie Xiang, ACD/NCAR, COSMIC/UCAR visiting scientist from Department of Atmospheric science, Nanjing University, Nanjing, China.

2009-2010: supervisor of Dr. Junmei Zhang, COSMIC/UCAR visiting scientist from Institute of Atmospheric Physics, Chinese Academy of Sciences, Beijing, China.

2009-2011: supervisor of Teresa VanHove, COSMIC/UCAR associate scientist.

2010-present: co-supervisor of Jerry Raj, Ph. D. student from the National Central University, Taiwan.

2010-present: supervisor of Wen-Hsin Teng, student visitor from the National Central University, Taiwan.

2011-present: supervisor of Dr. Liang Peng, COSMIC/UCAR visiting scientist from Institute of Atmospheric Physics, Chinese Academy of Sciences, Beijing, China.

2010-present: co-supervisor of Dr. Barbara Scherllin-Pirscher, a NCAR ASP postdoctor scientist, who is originally from University of Graz, Austria.

2010-present: co-supervisor of Dr. Zhen Zang, NCAR COSMIC project scientist.

2011-present: co-supervisor of Mr. Riccardo Biondi, Ph. D. visitor from DMI.

2012-present: co-supervisor of Ms. Xu Xu, Associate Professor visitor from China

Hosting Scientific Visitor:

2010, July: Dr. Andrea Stenier, research scientist from WegC, Graz

2012, July: Dr. Uli Foelsche, Associate Professor from WegC, Graz

「學者交流訪問計畫」

短期訪問進行情形報告

訪問學者	Shu-Peng Ben Ho		
主辦單位	全球定位科學研究中心(GPS-ARC)	邀訪者	黃清勇 教授
時 間	2013年1月27日至2013年2月1日		

主旨：來台進行短期訪問研究及演講

行程及活動經過：

1/27：抵達台灣

1/28：在中央大學 GPSARC 進行討論研究合作

1/29：在中央大學大氣系進行討論研究及專題演講

1/30：在中央大學大氣系進行討論研究合作

1/31：在中央研究院進行討論研究及專題演講

2/01：在中央大學 GPSARC 進行討論合作論文撰寫重點

檢討：無

建議：這次何博士訪問中大，除與 GPSARC 及大氣系同仁交流，亦安排至中研院全變中心專題演講。何博士專長為 GPS 掩星觀測資料分析及應用，對使用掩星之溫濕度於詮釋氣候變異及暖化趨勢有深入的研究。在台灣，關於全球及區域氣候變異分析及模擬，也有一些同仁在各單位進行研究，但大多未直接使用 GPS 掩星觀測資料。就未來福衛七號資料，應提昇各單位來廣泛應用，增進我國重要的氣候變異模擬能力。

相關活動：

在大氣系及中央研究院專題演講：

Current Developments on the Applications of COSMIC from the Troposphere to Stratosphere and the Potential Impacts of COSMIC-2 Data

Shu-peng Ho

COSMIC, University Corporation for Atmospheric Research, P.O. Box 3000, Boulder, CO
80307-3000

摘要

Since the launch of the COSMIC constellation in 2006, FORMOSAT-3/COSMIC has provided more than 3.2 million Global Positioning System (GPS) radio occultation (RO) soundings (~1500

soundings per day) to support research and operational numerical weather prediction (NWP). COSMIC data processed by the COSMIC Data Analysis and Archive Center (CDAAC) have been widely used by meteorology, climate, and ionospheric communities. As of June 2012, more than 1,900 researchers from 63 countries have become registered users of the data. The success of COSMIC has also prompted U.S. agencies to move forward with a follow-on RO mission (called FORMOSAT-7/COSMIC-2, hereafter COSMIC-2) with Taiwan that will launch six satellites into low-inclination orbits in early 2016, and another six satellites into high-inclination orbits in early 2018. Being developed by JPL, the GNSS RO payload, named TriG (Tri-GNSS), is designed to track RO signals from the GPS, GLONASS, and Galileo systems. It is expected to track up to 12,000 high-quality profiles per day after the two constellations are fully deployed. The COSMIC-2 soundings are expected to have better signal-to-noise ratios than those of COSMIC, which would provide an unprecedented capability to explore new applications for weather, climate, and ionospheric communities. The objective of this talk is i) to highlight accomplishments and discuss the remaining challenges in the areas of RO data applications; and ii) to summarize potential new applications that can be explored using COSMIC-2 data.

摘要 Abstract:

Since the launch of the COSMIC constellation in 2006, FORMOSAT-3/COSMIC has provided more than 3.2 million Global Positioning System (GPS) radio occultation (RO) soundings (~1500 soundings per day) to support research and operational numerical weather prediction (NWP). COSMIC data processed by the COSMIC Data Analysis and Archive Center (CDAAC) have been widely used by meteorology, climate, and ionospheric communities. As of June 2012, more than 1,900 researchers from 63 countries have become registered users of the data. The success of COSMIC has also prompted U.S. agencies to move forward with a follow-on RO mission (called FORMOSAT-7/COSMIC-2, hereafter COSMIC-2) with Taiwan that will launch six satellites into low-inclination orbits in early 2016, and another six satellites into high-inclination orbits in early 2018. Being developed by JPL, the GNSS RO payload, named TriG (Tri-GNSS), is designed to track RO signals from the GPS, GLONASS, and Galileo systems. It is expected to track up to 12,000 high-quality profiles per day after the two constellations are fully deployed. The COSMIC-2 soundings are expected to have better signal-to-noise ratios than those of COSMIC, which would provide an unprecedented capability to explore new applications for weather, climate, and ionospheric communities. The objective of this talk is i) to highlight accomplishments and discuss the remaining challenges in the areas of RO data applications; and ii) to summarize potential new applications that can be explored using COSMIC-2 data.

Current Developments on the Applications of COSMIC from the Troposphere to Stratosphere and the Potential Impacts of COSMIC-2 Data

Shu-peng Ho

University Corporation for Atmospheric Research/COSMIC, USA

1

Theme : Bridge to the future; and Bridge to other communities

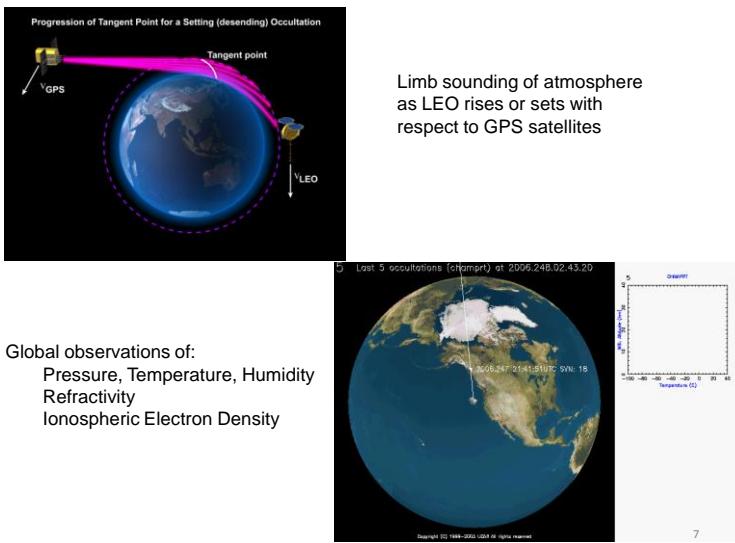

The purpose of this workshop is to provide a forum for scientific discussions between the RO community and the weather, climate, and space weather communities, which is crucial to capitalizing the scientific opportunities provided by past, current, and future RO missions. A dialogue between RO data providers and data users is also important to ensure optimal use of RO data for research and operational applications.

Background

1. Since the launch of COSMIC in 2006, we have organized five COSMIC Data Users Workshop, to discuss accomplishments in:
 - RO operation and algorithm development
 - Meteorology application
 - Climate
 - Ionospherethrough accessing COSMIC data from CDAAC.

What have we accomplished ? What are outstanding issues remaining?
Who are using these data/who are not ? Help users to better use the RO data.
